CubeServ: Generating Reports 100 Times Faster with the SAP® BusinessObjects™ Cloud Solution

When they need systematic data analysis, CubeServ is one of the first firms companies call. Customers appreciate its unparalleled consulting and the ability to obtain such services from a single source. Meanwhile, CubeServ relies on high-performance analytics solutions for its own reporting as well – typically in on-premise configurations. Recently, however, the SAP partner shifted its focus to take advantage of the cloud.

"SAP® BusinessObjects™ Cloud gives us all the processes we need in a single solution, including for planning, visualization, and predictive analytics," explains Norbert Egger, managing director and board chairman at CubeServ. A number of functions were ready to use just a few days after the company began implementing the solution. With it, CubeServ can now analyze and visualize its business data up to 100 times faster. Egger adds, "The self-services and overall value for the money you get with SAP BusinessObjects Cloud are really hard to beat."

Objectives

- Start using a flexible, forward-thinking, and affordable cloud platform for analytics
- Reduce time needed to prepare dashboards for quarterly reports (including profit-and-loss statements, current orders, and forecasts)
- Implement self-service tools for generating reports whenever needed

Why SAP

- SAP® BusinessObjects™ Cloud solution, which facilitates centralized views, planning, and predictive data analyses
- Support for integration with the SAP Business Warehouse application and existing data logic
- Ability to fully migrated current data to the cloud or visualize it there through Web reporting
- Flexible subscription model that is ideal for small numbers of users

Resolution

- Significant reduction in reporting effort
- Intuitive tools that enable even unskilled users to quickly generate and view simple reports
- Flexible options for combining data and models into custom dashboards

Future plans

Merge internal and external data in order to create the entire corporate group's annual report in the cloud

"Creating models and defining key performance indicators for our quarterly meeting dashboard couldn't be easier, thanks to SAP BusinessObjects Cloud."
Norbert Egger, Managing Director and Board Chairman, CubeServ AG

A few days

Into implementation to make initial functions available

50x

Faster dashboard generation

10x–100x

Faster uploading, integration, and analysis of data
